

Press release

Nexans power, signaling and instrumentation cables installed in Terminal 3 at Moscow's Sheremetyevo airport

Paris, November 19, 2008 – Nexans, the worldwide leader in the cable industry, has supplied 3 million Euro worth cables, for the construction of the new terminal at Moscow's Sheremetyevo airport – Russia's largest international airport.

Nexans provided around 500 kilometers of cables, comprising of power network, signaling and instrumentation cables. The cables were manufactured by Nexans Turkey in its Denizli and Tuzla factories.

The cables selected for the airport will be installed by the main contractors participating in the project: SITA, ThyssenKrupp and Vanderlande Industries. SITA will provide IT systems that will allow the airport's self-service and desk check-in facilities to process up to 3,800 passengers per hour. Boarding bridges will be provided by ThyssenKrupp, and Vanderlande Industries will supply the automated baggage handling system. Nexans is also supplying special cables for some of these applications.

"The Nexans project has already won accolades from Enmar, 100% subsidiary of ENKA Construction from Turkey as the project developer and contractor, for the quality and promptness of delivery, and for the level of technical support provided" underlines Paolo Pieri, Airport Infrastructure Business Segment Manager of Nexans. He added *"Nexans Turkey has worked with ENKA on a variety of national and international projects for the past 20 years"*.

For airport infrastructure, Nexans provides a complete range of cables from key energy and communication networks to multiple terminals and hangars, control tower and runways. In order to optimize safety, security and efficiency within the airport, Nexans supplies high and medium voltage underground power cables to feed all vital airport applications, low voltage power cables for weather beacons, fiber optic cable for radar control networks, and flexible halogen-free control and power cables for baggage handling systems.

About Sheremetyevo Terminal 3

The new terminal – which is being constructed for Russia’s national airline, Aeroflot – will cost in the region of 340 million Euros. It is situated about 29 kilometers north-west of Moscow, and is due for completion by the end of this year. Passengers will begin using it by March 2009. The terminal will serve Aeroflot and other members of the Sky Team Alliance including: Alitalia, Air France, Delta, KLM and Korean Air.

About Nexans

With energy as the basis of its development, Nexans, the worldwide leader in the cable industry, offers an extensive range of cables and cabling systems. The Group is a global player in the infrastructure, industry, building and Local Area Network markets. Nexans addresses a series of market segments from energy, transport and telecom networks to shipbuilding, oil and gas, nuclear power, automotive, electronics, aeronautics, handling and automation.

With an industrial presence in more than 30 countries and commercial activities worldwide, Nexans employs 22,800 people and had sales in 2007 of 7.4 billion euros. Nexans is listed on NYSE Euronext Paris, compartment A. More information on <http://www.nexans.com/>
