Nexans Network Solutions – div. Euromold provides accessories for connecting, joining and protecting the energy cables in the electrical distribution network and generation of energy. Our innovative product, solutions and services, help our customers to realize a reliable energy friendly network with decentralized and alternative generation of energy.

The Strategic goals of the company are :

- Keep our leading position within Western Europe.
- Aiming for a market leading position in intelligent networks and renewable energy (with a strong focus towards wind energy). Therefore we propose solutions and services allowing, reliability, energy prestation and intelligent networks with distributed (alternative) energy.
- Preserve our competitiveness by investing in commercial services, optimized sales channels and efficient logistic services adapted to the needs of our customers.
- Extend our product range in function of the needs of our customers and becoming a network specialist. Therefore we engage ourselves to stimulate custom made solutions, taking into account environmental, energy and safety impacts and forming partnerships to offer total solutions and search further than existing solutions using smart accessories.
- Caring for the environment, energy and a safe, healthy work environment in order to minimize the environmental impact and risks and thus to prevent environmental pollution, injury and illness prevention.
- Compliance with legal and other requirements concerning environmental, energy and well-being at work applied to our activities, services and products.
- Purchase of energy-efficient products and services, and design for energy performance improvement
- Continuous development of our people and continuous improvement of all our processes in function of the market needs and the realization of above strategic goals
- We will promote energy savings and safety awareness for our employees
- To improve our performances addressing risks and opportunities.
- An open communication through consultation and participation of employees
