JUMPERS AND TESTLEADS

APPLICATION

Jumpers are prefabricated lengths of cable on which separable connectors or terminations are installed on each end. Jumpers are used as fixed solutions in windturbines, transformers, ...
Test leads are typically used to perform tests on electrical installations, transformers, motors...

DESIGN

Jumpers comprise:

1. Connector or termination adapted to the chosen interface type and chosen voltage class.
2. Cable length.
3. A screen wire finishing with an earthing lug is standard. Other finishings are available upon request.

All Jumpers are standard tested for AC withstand and partial discharge before leaving the factory. Other tests can be done on request.
